Forecast For Northwest England
Issued by Met Office Exeter
at 0400 on Friday 31 Dec 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Variable amounts of cloud, outbreaks of rain, unseasonably mild.

Today:
New Year's Eve will start windy and rather grey with outbreaks of rain and drizzle mainly over high ground. It should turn drier and brighter throughout the afternoon. Remaining mild. Maximum temperature 14 deg C (57 deg F).

Tonight:
Remaining generally cloudy with a few clear spells developing. Rain quickly pushing eastwards around midnight. Winds easing through the evening though picking up again in the early hours. Staying mild. Minimum temperature 9 deg C (48 deg F).

Saturday:
A dry start to New Year's Day but cloud quickly gathering from the west with outbreaks of rain pushing east, sunny spells following. Maximum temperature 13 deg C (55 deg F).

Outlook for Sunday to Tuesday:
Remaining windy with further showers on Sunday and Bank Holiday Monday. A band of rain likely to edge south on Tuesday introducing colder conditions, showers turning wintry over hills later.
